REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not teach nor suggest the process of coating an adhesive layer onto a workpiece surface by applying adhesive coated onto a media, putting the adhesive-coated media into a container with at least one workpiece, and colliding them via vibrating or stirring to form an adhesive coating on the workpiece surface bearing the advantages set forth in [0033] of the Specification.
2. The prior art contains various ways to coat adhesive onto workpieces in a container : US 5945154 which puts workpieces in a bin with granular paraffin and tumbling the bin to form a paraffin coating onto the workpiece surface; JP 07-062562 teaches coating a workpiece with uncured adhesive, and vibrating it in a container with media to cause collisions which improves coating uniformity and quality; US 5505990 agitates a mixture of impact media, adhesive and workpieces to form coatings thereon which are then cured. None of the prior art references teaches to apply the adhesive to the media *prior to their being added to the container* to allow collision to form an adhesive coating on the workpiece with the benefits of Specification [0033, etc].

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
